

ECAMP Revision Notice A

Part II

Environmental Community Air Monitoring Plan During the Abatement and Demolition of 133-135 Greenwich Street and 21-23 Thames Street February 1, 2006

Project Manager:

Benn Lewis

Field Sampling Coordinator:

Michael Porter

Owner's Representative:

Chanan Rozenbaum

Date Submitted: 2/1/06

Revision 1:

Community monitoring for Total Dust is not to be conducted as noted in the original plan.

Reason for Revision:

This sampling was not edited from an earlier version of the ECAMP that was based on the 4 Albany Street sampling plan. Community monitoring for airborne particulate levels is being conducted by real-time EBAM, and reference method testing for particulate is being conducted by TEOM. A corresponding revision is made to the Quality Assurance Project Plan (QAPP) document. No Target Air Quality Level and no EPA Trigger Level have been established as reference points for this sampling.

ECAMP Sections Revised:

Table 1 – Community Air Monitoring (and Table 1 Notes)

Implementation Date: November 21, 2005

Revision 2:

Containment area monitoring for silica and metals is not to be conducted as noted in the original plan.

Reason for Revision:

This sampling was not edited from an earlier version of the ECAMP that was based on the 4 Albany Street sampling plan. This sampling is not required for asbestos abatement containment monitoring per NYC Title 15, and therefore, no reference values for the results of this testing are included in NYC Title 15. Testing for these parameters is being conducted as a part of the community monitoring program that is being executed according to the Quality Assurance Project Plan for the project.

ECAMP Sections Revised:

Section 3.3 Abatement Phase Work Area Monitoring
Table 3 Abatement Phase Work Area Monitoring (and Table 3 Notes)

Implementation Date: November 21, 2005

Revision 3:

PCB sampling method has been changed to reflect the TO-4A high volume sampling method.

Reason for Revision:

The reference to a low-volume sampling method was inadvertently included in the original document.

ECAMP Sections Revised:

Table 1

Implementation Date: November 21, 2005

Revision 4:

Text has been added to the Community Air Monitoring Location Figure related to the moving of the Thames Street air monitoring station.

Reason for Revision:

Clarity and consistency with the ECAMP was requested.

ECAMP Sections Revised:

Attachment C

Implementation Date: February 1, 2006
